

BikeBus Privacy Policy

Last Updated: August 19, 2025

This Privacy Policy explains how BikeBus ("we," "us," or "our") collects, uses, and discloses information from users of the BikeBus mobile application (the "App").

1. Information We Collect

Location Data (Operator Mode Only): The BikeBus App collects location data *only* when the user is in "operator mode." Operator mode is a specific function of the App designed for designated operators. If you are not in operator mode, your location data is **not** collected.

When in operator mode, the App collects the following location data:

- **GPS coordinates:** Latitude and longitude.
- **Timestamp:** The time at which the location data was collected.

This location data is used to publish the location of the Operator on the BikeBus website (<https://bikebus.bike>) or other BikeBus applications in its default mode, to monitor routes. The location data is also used for analyzing and improving the app efficiency and creating or routing of BikeBus services.

2. How We Store Your Data

The location data collected in operator mode is stored anonymously. The data is associated with a session cookie, and the only other information stored is the IP address from which the data was received. The session cookie data and IP addresses are used mainly to identify the particular route of the Operator and to aggregate the location data to a particular anonymous Operator. The location data is not linked to any personal identifying information, such as your name, email, or device ID.

3. How We Use Your Data

The location data collected in operator mode is used for the following purposes:

- **Publish Current Location:** When the App is in Operator Mode, the App publishes the location to the central BikeBus server. The website and other apps will show the current location of the Operator for a particular route on the BikeBus website, which is also viewed in other instances of the BikeBus app monitoring that particular route.
- **Service Analysis:** To analyze and understand traffic patterns and times, and improve the overall efficiency of BikeBus operations.
- **Service Improvement:** To identify areas for service expansion or modification.

We do not use your location data for any other purpose, such as marketing or advertising.

4. Data Retention

The location data we collect is temporary and is typically deleted after a few weeks. We do not retain this data for longer than is necessary to perform any analysis.

5. Third-Party Services

BikeBus does not share your location data with any third-party services or individuals, except as required by law.

6. Children's Privacy

Although the BikeBus app is intended to “get kids to school” the App is usually used by parents to locate the BikeBus, which is the current location of the Operator for that particular route. The Operator should be a parent or some other adult. The BikeBus App in Operator Mode is not intended for use by children under the age of 13, although the BikeBus App not in Operator Mode, i.e. Monitoring Mode, may be used by children under the age of 13 to locate the BikeBus on a route. We do not knowingly collect personal information from children under 13. If you are a parent or guardian and believe your child has provided us with personal information, please contact us at polar@adiron.com.

7. Changes to This Privacy Policy

We may update our Privacy Policy from time to time. We will notify you of any changes by posting the new Privacy Policy on this page. You are advised to review this Privacy Policy periodically for any changes.

8. Contact Us
